

*Lead software engineer crafting stories with code for 15+ years*

## Summary

Highly skilled and experienced software architect and leader with a strong track record of delivering exceptional software solutions. Proficient in multiple programming languages and frameworks with proven ability to deliver high-quality software design and architecture. Strong cross-functional collaboration and stakeholder management abilities.

Excels in leadership roles, effectively guiding and mentoring development teams to achieve project success. My collaborative approach fosters productive and enjoyable teamwork.

My full-stack development experience covers frontend and backend technologies, complemented by expertise in Unity3D for game development and interactive experiences.

## Top Skills

TypeScript, React, Unity3d/C#, Node.js

## Experience

### **STAFF SOFTWARE ENGINEER, RO, NYC – NOV 2020-PRESENT**

Architecting and leading several business-crucial initiatives, including overhauling an internal pharmacy management tool, resulting in scoring 95% customer satisfaction rating; state-of-the-art drug utilization system; streamlined, safe, and efficient system of patient's request reviews.

Leading by example, continuously mentoring and supporting senior software engineers across the organization. Implemented best practices for frontend development, including modular domain-driven code design, and efficient testing strategies

Improved the stability and maintainability of the internal application responsible for the management and shipping of hundreds of thousands of highly regulated healthcare products by establishing architectural best practices, rigorously increasing test coverage, and upgrading underlying technical solutions.

### **LEAD SOFTWARE ENGINEER, INTENT, NYC – SEP 2019-OCT 2020**

Architected and led the team of software engineers in the development of enterprise-level full-stack tools allowing `Intent` to target, bucket, and manage two billion annual users into 16 million configurable permutations.

Led cross-functional iterations with Product, UX, and internal stakeholders, leading the development of full-stack enterprise tools controlling billions of annual unique page views.

Evangelized best practices, convincing a 13-year-old engineering department to adopt TypeScript and Clean Architecture. Earned a pivotal position in post-COVID-19 restructuring to develop multiple enterprise-level and customer-facing products.

**LEAD CONSULTANT, BUILDIT @ WIPRO DIGITAL, NYC – APR 2018-SEP 2019**

Collaborated cross-functionally with delivery leads, engineers, and creative technologists to help clients evolve and make the next ambitious step in their digital journey using modern full-stack frameworks and tools. Crafted, led, and taught enterprise training program aimed to hire, educate, and prepare junior frontend developers for client-facing consultancy job.

**SENIOR SOFTWARE ENGINEER, ZS ASSOCIATES, EVANSTON, IL – OCT 2016-MARCH 2018**

Maintained and extended enterprise front-end library, created new components for various enterprise projects, trained and mentored several engineering teams in adopting best practices. Organized company-wide training courses teaching advanced frontend-development concepts and practices.

**SOFTWARE DEVELOPER / LEAD SOFTWARE DEVELOPER, VARIOUS COMPANIES, KYIV, UKRAINE – END 2006 - OCT 2016**

Solo developed and led teams in crafting innovative, rich, interactive websites, apps, and games

## Accomplishments

Won a company-wide award “The ROies” in “Delivering results” category – 2022

## Education

National Aviation University, Information security – Master’s, 2011

## Pet Projects

**QUEEN'S TOWERS**, [UNITY/C#](#). [VIDEO](#). [SOURCE CODE](#). [PLAY IT SIMMER](#).

Tower Defense game where you have to stand tall against hoards of blood-thirsty enemies!

**CLANFIRE**, [UNITY/C#](#). [SOURCE CODE](#). [VIDEO \(MAP GENERATOR\)](#). [VIDEO \(GAMEPLAY\)](#)

Civ 6 inspired turn-based game with procedurally generated maps (in active dev)

**UNNAMED**, [UNITY/C#](#). [VIDEO](#) [PLAY IT ON ITCH.IO](#)

Dark, emotional visual novel that tells a story of two kids trying to find their mother in the town torn apart by the war.
